

# GIF Tube™

Needleless Subcutaneous Fluid Administration  
PRACTIVET

Using a 10-minute, minimally invasive procedure, you can implant a subcutaneous fluid administration tube that allows CLIENTS to administer needleless SQ fluids.

“Partnering with you to bring New Technology, Quality, Reliability and Service  
Above and Beyond”

## FEATURES

- Simplifies home SQ therapy
- Well tolerated and simple to access
- Painlessly delivers 100 ml in 60 seconds
- High client and patient acceptance
- Proven for long-term use (over 1 year)
- Longest recorded duration of tube is 4 years
- Veterinarian designed and tested
- Fully documented and supported

## APPLICATIONS

- Chronic renal failure in cats, dogs and ferrets
- Administration of epogen, insulin and other injectable medication
- Procedure is complete in less than 10 minutes
